

## Roof Consultation

Benefit from hiring a Master Roofing Expert for an objective and professional report. Over 40 years first hand experience and an extensive resume with certification in all types of roofing gives you comfort knowing you have a dedicated Pro looking out for you. We provide a complete roof analysis as well as moisture and leak detection.

## Going Green

We have teamed up with several manufacturers who can provide green options to suit your sustainable roofing needs. We offer renewable eco-conscious roof solutions. Ask about our garden roof available for low-sloped roofs! Partner with "Cool" roofing materials, and you will notice a comfortable difference in your energy savings for years to come.

## Emergency Leak Repair

A leaking roof can cause devastating amounts of damage. No matter the type or style of roof, we provide leak repair for all residential and commercial roofs. A new roof not in the budget? We will give an honest opinion on the amount of life that remains in your current system. A repair can sometimes give you many more years of use and we promise not to use a high-pressure sales tactic to sell you something you don't need.

## Proactive Maintenance Plan

You take your car in for routine maintenance and you go to the doctor for checkups... Why not take an active role in the care and upkeep of the very thing that protects your building, houses your valuable assets, and keeps loved ones safe and healthy. With a repeating six month visit we will keep an eye out for any potential issues to prevent them from becoming big problems.

## Historic Restoration

With an appreciation for the architectural past, DACA stays true to the historic integrity of a structure while embracing new and innovative ideas for the future. We use old world techniques from true Master Craftsmen, and employ the best eco-friendly options and modern scientific applications for a sustainable future.

With DACA, you get the finest combination of Craftsmanship, Experience, and Honesty. You get...

## Liberty Hall & Sunflower Bike Shop

Lawrence, KS

DACA replaced the existing roof with a 60mil Extreme TPO membrane. After completion, we installed thin film solar panels for electrical generation. The solar panels help mitigate the building's large energy requirements. Using a white reflective roofing membrane is a must for energy efficiency.

## Art in the Roof - Stone Slate

Buckhead, GA

While you may commonly see art designs in slate on a vertical wall in Germany, it is very rare indeed to see it set into the roof as you see here. One of the most challenging aspects of working with natural stone slate is shaping it to the will of the Artisan. Weaving it into a roof while maintaining watertight integrity in this matching design was the culmination of many years of expertise.

## Victorian Home of E.T. Webb

Webb City, MO

Elijah Thomas Webb: This is one of the most beautiful and amazing homes we have had the pleasure to help revive. The 135 year old house was in need of new copper valleys and broken slate replacement. We matched the slate and restored the roof to its former glory.

## Metal Standing Seam Roof

Baldwin City, KS

Metal Standing Seam is a popular low-maintenance choice for many homes. It has a clean and charming look.

## Deltec Round House

Lawrence, KS

This eco-friendly home of the future is completely circular and built green with sustainable, energy efficient materials. The recycled aluminum shingle-style roof system is designed specifically for the Deltec home package and boasts a cool roof coating to keep temperatures and costs low.

## Stone Cottage - Stone Slate Roof

Baldwin City, KS

This beautiful stone cottage was in need of a new roof. DACA installed imported Spanish slate and added our personal touch with some red slate and accenting designs, while restoring the historic home's original charm and grace.
